Subject: M/023/004 OLD Martin Marietta Bond

I talked with Lynn Findley, USFS Fishlake NF (801) 896-9233 regarding the situation with the Martin Marietta bond for the Leamington Quarry. The last piece of correspondence they have which specifically refers to the bond is a 11-12-87 letter to DOGM. After that time they have no documents from DOGM, the USFS, or Martin Marietta which refer to the bond until inquiries made this month. A DOGM letter allowing the USFS to release the bond is being prepared for Jim Carter's signature.

Martin Marietta's Dump- Lynn reviewed the USFS files regarding the dump area which is supposedly the responsibility of Martin Marietta. (During the site inspection of 5/2/95 Ash Grove described the water monitoring wells around the dump and informed us that Martin Marietta was still responsible for that area.) Lynn found no mention of any areas excluded/retained in the USFS transfer documentation for the transfers from Martin Marietta to Southwestern, and Southwestern to Ash Grove. There is no mention of any excluded/retained areas in the Division's files either. Therefore, we have no documented reason to retain the Martin Marietta bond or any portion thereof.
